DISPENSARY

Using IV therapy allows for the delivery of nutrients directly into the bloodstream in a high concentration to correct frank deficiency, and delivers therapeutic doses of vitamins to activate biochemical pathways in the body, not normally achieved when supplementing with oral vitamins. This therapy improves absorption rate, delivery time and bypasses any digestive malabsorption concerns by delivering the nutrients straight to the tissues in need.

Nutritional IV Vitamin and Mineral therapies have been effective in helping to treat:

- Acute infections
- Asthma
- Athletes who need quick recovery for athletic events
- Bronchitis
- Cancer
- Cardiovascular disease
- Chronic Fatigue Syndrome with or without Epstein-Barr virus
- Colds / flu
- Congestive heart failure
- Depression
- Fibromyalgia
- Headaches (migraines and tension)
- Ischemic vascular disease
- Muscle spasm and pain
- Narcotic withdrawal
- Respiratory problems
- Seasonal allergic rhinitis
- Sinusitis

*Our clinic also offers several vitamin intramuscular injections as well.*
